I am most excited about the glass straws...I don't like how the biodegradable ones melt in hot liquids, so I have been looking for an alternative.

I like the glass straws! I'm working to go as "green" as possible. I use reusable bags, buy everything possible in glass, use reusable plates and cups instead of plastic..... my younger daughter has sensory integration struggles and only uses a straw, so right now that is the main source of plastic in our home.... straws.... I would love to have glass ones for her to use!

However, I would love those lamps! Beautiful!!!!!!

I especially would love to try out the sunscreen, since I've been looking for a safer kind compared to what you typically find in the average store!

I visited your sponser Goddess Garden and learned that their sunscreen is made out of 82% Certified Organic ingredients and does not contain harmful ingredients that can harm your skin! And orders of \$45 or more on their site have free shipping. 😊

Visited your sponser Himalayan Salt Shop, and learned that their business began in the basement of a two family house in Bloomfield, NJ., and that their lamps are made of natural crystal salt and can cleanse the air naturally!

Visited your sponser GlassDharma, and was surprised to learn that their straws will easily withstand dishwasher and microwave use, and that the color on their straws is actually colored glass, with no paints or coatings on our straws.

Goddess Garden products look like a breath of fresh air! My family has sensitive skin - which means we need protection from the sun - but also sunscreen without crazy chemicals - Goddess Garden would do just that!

I would like to win the Himalayan Salt Lamp, because I think it would help my daughter. She has many health problems and a product that relieves symptoms from asthma, allergies, and other illnesses might help her.
