[What is a Himalayan Salt Crystal Lamp?](#)

-These lamps are made of natural crystal salt mined from underground salt mines in the foothills of the Himalayan Mountains

-The beautiful orange-reddish Himalayan crystal salt is mounted on a wooden base
-This crystal salt is hundreds of millions of years old and, as a result, has special properties and high mineral

content

-Heat from the bulb (in our lamps) or flame (in our candle holders) causes the salt to emit negative ions
-These negative ions bond with the pollutants in the air (positive ions) and neutralize them
-Also, the newly bonded ions become heavier and fall to the ground removing them from the air circulation

-In addition, these negative ions combat electro-smog caused by electronic devices operating in the home
-Symptoms from asthma, allergies, and other illnesses can also subside from the effects of these products
-Concisely, these products cleanse the air naturally and are extremely beautiful

I have extremely bad seasonal allergies which can not be treated with medicine. So because of this I am completely miserable from April til May which is not fun. Spring is such a beautiful time of the year & I haven't enjoyed it for the past 5 years. Medication once worked before getting pregnant with my son & then after I can't find anything that works. The worst part is that now I am having a hard time breathing when my allergies start up. So hopefully this cool little treasure will help my allergies.

Not only is the salt lamp beautiful it also has healing benefits!!!

[Facts about a Himalayan Salt Lamp](#)

A Himalayan Salt Lamp is made from a chunk of salt crystal rock that was taken from the salt mines found in underground caves in the foothills of
